

# Roof Extensions & Lean-To's

Using These Two Methods For Creating Extra Space In Your Facility Improves Functionality While Saving Money On The Structure Overall.

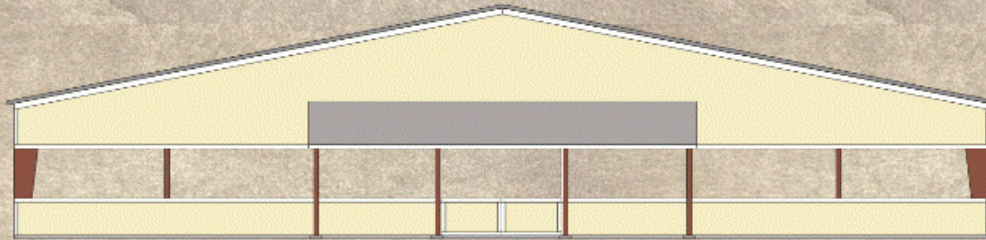

A Wider Clear Span Is More Expensive To Build Than Adding Space As Shown So Be Sure To Indicate The Size Of The Arena Separate From The Additional Space Needed When Requesting A Quote.

## Roof Extensions

Follows The Same Line As The Main Roof For A Seamless Style  
Add Stables, Storage, Return Alleys, Spectator Areas, Offices, Etc. Under One Roof  
Saddle Up And Ride Without Leaving Your Facility  
Can Be Fully Sheeted As Shown, Continue The Same Design As The Arena Or Left Open On The Walls (roof only)

## Lean-To's

Add Covered Space To The Sides Or End Walls Of Your Arena  
Can Be Used For The Same Purpose As A Roof Extension Or For Stock Pens  
Staging Areas, Covered Porches & Equipment Storage

## Examples Of Use
